**How to keep your business blossoming:**

**Save:**

People always go into business without any savings, exclusively using loan money from friends and banks. They expect to be able to start paying the loans back right away with their profits. A better plan is to save as much of the needed investment money as possible, including your living expenses for the first year or even two. Your business won't be profitable for one to two years.

### *Understand how to make profits:*

You should be able to state in just a few sentences how your business plans to make substantial profits. For starters, you need to know your costs, how much you will spend purchasing inventory, paying the rent, compensating any employees and covering other costs.
